MARKET COMMENTARY9.

In July, the WisdomTree U.S. Quality Dividend Growth Fund (DGRW) returned 1.74% at NAV, underperforming the S&P 500 by 0.50%. U.S. equities experienced their third consecutive month of gains amid improved macroeconomic sentiment driven by successful trade negotiations with major partners, which alleviated tariff uncertainties and boosted investor confidence. These developments, coupled with a more optimistic Q2 earnings outlook, supported market performance. However, DGRW lagged the index due to sector allocation effects, notably its underweight position in the strong-performing Information Technology sector and overweight in Consumer Staples, which was among the weaker sectors in July. Overall, positive macroeconomic news helped sustain equity markets, although fund-specific sector exposures influenced relative performance.

Since the target fund is USD-denominated, the return of this peso share class fund was significantly higher than that of its dollar share class as the Philippine peso weakened against the US dollar.

FOOTNOTES

*Quoted Asset Management Charge is inclusive of Fund Manager, Custodian and Fund Administration Tees and VAT. Please note that the target fund of the Fund charges a separate management fee which is included in the computation of the Fund's NAVpu.

²Volatility measures the degree to which the Fund fluctuates vis-à-vis its average return in a specific period. The lower the number the more stable the Fund's return is.

³The Fund targets a 5.00% annualized payout rate (1.25% quarterly), which is not guaranteed and may change at the discretion of AXA Philippines.

⁴ Price return refers to the fund performance based on the NAVPU movement of the fund with the payout deducted from NAVPU
