RISK PROFILE

High Risk

Lower risk **1 2 3 4 5** Higher risk

Fund risk ratings are calculated based on the historical volatility of the fund in order to match the client's risk profile. A risk profile of 5 matches with the aggressive investor, indicating a fund with a high volatility profile (i.e. growth equities).

INCOME PAYOUT

Target Payout³ **5.00% annualized**
Payout Frequency **Quarterly**

MARKET COMMENTARY⁹

In June, the WisdomTree U.S. Quality Dividend Growth Fund (DGRW) returned 3.76% NAV, underperforming the S&P 500's 5.09% gain due to its underweight positions in the top-performing Information Technology and Communication Services sectors. Despite the broader market reaching new highs and benefiting from strong economic data and positive trade developments, June's rally was characterized by limited sector participation, with only these two sectors outperforming the index. The market's resilience was supported by subdued inflation concerns and improved earnings outlooks, leading to increased investor optimism. However, DGRW's performance lag was driven by its sector allocations, which did not favor the sectors leading the rally. Overall, market sentiment remains positive amidst a backdrop of steady economic growth and improving risk appetite.

Since the target fund is USD-denominated, the return of this peso share class fund was significantly higher than that of its dollar share class as the Philippine peso weakened against the US dollar, with a +1.1% MoM return.

FOOTNOTES

¹ Quoted Asset Management Charge is inclusive of Fund Manager, Custodian and Fund Administration fees and VAT. Please note that the target fund of the Fund charges a separate management fee which is included in the computation of the Fund's NAVPU.

² Volatility measures the degree to which the Fund fluctuates vis-à-vis its overage return in a specific period. The lower the number, the more stable the Fund's return is.

³ The Fund targets a 5.00% annualized payout rate (1.25% quarterly), which is not guaranteed and may change at the discretion of AXA Philippines.

⁴ Price return refers to the fund performance based on the NAVPU movement of the fund with the payout deducted from NAVPU

⁵ Total return refers to the fund performance based on the NAVPU movement of the fund with the dividend payouts taken into account as reinvested back to the fund value.

⁶ Cumulative returns is the total earnings performance of the fund in a specific period.

⁷ Annualized returns is the Compounded Annual Growth Rate, or the simulated growth rate on a yearly basis if Principal plus interest are re-invested annually.

⁸ Dividend history reflects the payout rate and not the dividend yield.
