### Risk Profile Disclosure regarding the Payout Feature of the Fund

#### RISK PROFILE

High Risk

The Fund is in category 5 due to the high level of volatility of returns. The risk indicator is based on the volatility of the Fund's performance over the last five (5) years. The risk category shown is not guaranteed and may shift over time due to changing level of volatility of the Target Fund.

Due to the investment universe and the investment objective, the Fund is suitable for investors seeking capital growth and income over a 10-year horizon and able to accept high level of volatility.

Variable life insurance product is subject to certain risks, such as, but not limited to **investment, credit, currency, liquidity, mark-to-market, regulatory, and taxation risks**. In addition, by investing in this fund, you are also exposed to the following risks:

- Hedging Risk** – A risk wherein the hedging instrument does not precisely offset the movement of the hedged item, usually due to a breakdown in correlation which results to lower hedge effectiveness. Hedging instruments usually provide protection when the asset value drops, but also limit upside participation performance.
- Real Estate Sector Risk** – As the Fund concentrates its assets in companies engaged in the real estate industry, investors are subjected to movements in the performance of the real estate markets. Property values may fall due to increasing vacancies or declining rents resulting from unanticipated economic, legal, cultural, or technological developments. It may also drop because of the failure of borrowers to pay their loans.
- REIT Risk** – REITs may be affected by changes in the values of the underlying properties that they own or operate. Further, REITs are dependent upon specialized management skills of the fund manager, and their investments may be concentrated in relatively few properties, or in a small geographic area or a single property type.
- Interest Rate Risk** - Interest rates are also tied to mortgage rates which affect some segments in the real estate or property sector. In general, when interest rates go up, mortgage rates also rise thereby decreasing demand for properties such as those in the residential market.

### Disclosure regarding the Payout Feature of the Fund

The Fund aims to pay out income based on a pre-determined frequency. Initial target payout rate of the Fund is 5% annually (0.42% monthly). However, the payout and the payout rate are not guaranteed.

**Payout formula: Income Payout = Account Value x Payout Rate\***

Example (Currency: PHP)	Payout Formula	Payout Amount
Payout Rate: 5% annualized (0.42% monthly) Payout frequency: monthly Launch Date: Oct 4 Declaration Date: Nov 4 Account Value: 1,000,000 (on Declaration Date)	$1,000,000 \times 0.42\%*$ *Rate based on payout frequency	<b>4,200</b> (1st monthly payout)

**A zero-payout or reduced payout rate may occur under certain adverse scenarios such as but not limited to severe negative fund returns or fund suspension.**

**Depletion of Living Benefit may happen if the fund rate of return is less than the payout rate. Policy may terminate because of continuous depletion of Account Value due to regular income payout and policy charges.**
