## MARKET COMMENTARY

The Federal Reserve cut rates for the third time in December, bringing the policy rate to 3.50-3.75%, as well as initiating "Reserve Management Purchases" to ease liquidity stress and support a steep yield curve. These moves by the Fed opens the risk of driving inflation higher in 2026. US economic growth surprised at 4.3% in Q3-2025, boosted by AI Capex and strong consumer spending, with continued growth expected into 2026 amid favorable policy tailwinds. Inflation remains stable at 2.7%, but current policies favor growth over inflation control, risking long-term inflation resurgence. The 10-year Treasury yield declined from 4.57% to 4.16%, with a rising spread indicating potential for yields to rise further, possibly reaching 4.31-4.36%. Fiscal policy easing and increased debt issuance under the Trump administration are likely to persist into 2026. The fund remains underweight, aligning with a bull steepener outlook.

## FOOTNOTES

<sup>1</sup> Quoted Asset Management Charge is inclusive of Fund Manager, Custodian and Fund Administration fees and VAT. Please note that the target fund of the Fund charges a separate management fee which is included in the computation of the Fund's NAVPU.

<sup>2</sup> Volatility measures the degree to which the Fund fluctuates vis-à-vis its average return in a specific period. The lower the number, the more stable the Fund's return is.

<sup>3</sup> Fund return refers to the fund performance based on the NAVPU movement of the fund.

<sup>4</sup> Cumulative returns is the total earnings performance of the fund in a specific period.

<sup>5</sup> Annualized returns is the Compounded Annual Growth Rate, or the simulated growth rate on a yearly basis if Principal plus Interest are re-invested annually.
