MARKET COMMENTARY

Global equities experienced a rally, with US stocks leading developed markets, driven by strong performances from mega-cap tech and the Federal Reserve's continued rate cuts, despite looming US government shutdown concerns. European markets were mixed amid sluggish Eurozone growth and political instability, notably the French government's collapse. Emerging markets outperformed, particularly Chinese stocks. Volatility decreased, with the VIX closing at 17.6, indicating market stability. Most sectors of the MSCI ACWI gained, notably information technology, communication services, and consumer discretionary, while consumer staples, energy, and real estate lagged. Key portfolio contributors include Tesla, TSMC, and ASML, whereas detractors include Apple, Royal Caribbean, and the absence of Alibaba exposure.

Since the target fund is USD-denominated, the return of this peso share class fund was significantly higher than that of its dollar share class as the Philippine peso weakened against the US dollar.
