Higher

Fund risk ratings are calculated based on the historical volatility of the fund in order to match the client's risk profile. A risk profile of 4 matches with the growthoriented investor, indicating a fund with a mediumhigh volatility profile (i.e. multi-asset funds).

MARKET COMMENTARY

Despite slower headline inflation rates, hopes for March interest rate cuts faded, as US average hourly earnings ticked up and jobs growth was far stronger than expected.

In the US, the S&P 500 Index (+5.34%) and the Nasdaq Index (+6.22%) hit record highs, while European markets lagged (STOXX Europe 600 Index +1.98%). Both Chinese and Japanese stock markets soared, with the Nikkei 225 Index topping its 1989 high.

The Fund generated positive performance for the period as global equity markets rallied once again during the month. AB American Growth was the leading contributor to performance as growth outperformed value for the month. Federated Hermes Asia ex Japan Equity and Goldman Sachs Emerging Market Core Equity also had a noticeable contribution to performance for the period. Selection Japan lagged behind other holdings for the month albeit still delivered a positive return.

The Peso appreciated against the Dollar in February to 56.20 from previous 56.28, contributing to a lower overall return of the fund.

FOOTNOTES

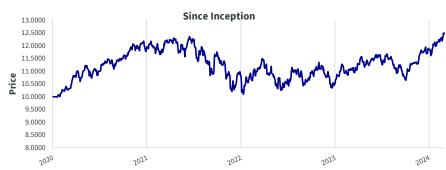

³ Fund return refers to the fund performance based on the NAVPU movement of the fund

Cumulative returns is the total earnings performance of the fund in a specific period.

⁵Annualized returns is the Compounded Annual Growth Rate, or the simulated growth rate on a yearly basis if
