MARKET COMMENTARY

In September, the fund delivered positive returns as global bond markets experienced mixed performance influenced by economic data and political developments. Government bonds outperformed both investment grade and high-yield credits, with the iShares Emerging Market Government Bond Index leading contributions, supported by US Treasury rate cuts. Conversely, CIBC Global Floating Rate Credit lagged, weighed down by its higher high-yield allocation. Overall, bond market dynamics contributed positively to the fund's performance during the month. Since the target fund is USD-denominated, the return of this peso share class fund was significantly higher than that of its dollar share class as the Philippine peso weakened against the US dollar.

FOOTNOTES

¹ Quoted Asset Management Charge is inclusive of Fund Manager, Custodian and Fund Administration fees and VAT. Please note that the target fund of the Fund charges a separate management fee which is included in the computation of the Fund's NAVPU.

² Volatility measures the degree to which the Fund fluctuates vis-à-vis its average return in a specific period. The lower the number, the more stable the Fund's return is.

³ Fund return refers to the fund performance based on the NAVPU movement of the fund

⁴ Cumulative returns is the total earnings performance of the fund in a specific period.

⁵ Annualized returns is the Compounded Annual Growth Rate, or the simulated growth rate on a yearly basis if Principal plus Interest are re-invested annually.
