## MARKET COMMENTARY<sup>9</sup>

The WisdomTree U.S. Quality Dividend Growth Fund (DGRW) posted strong returns but underperformed the S&P 500 amid a market rebound driven by increased risk appetite. Despite ongoing geopolitical, inflation, and monetary uncertainties, investor sentiment improved as energy prices stabilized and fears of disruption eased. Growth sectors such as Communication Services, Information Technology, and semiconductors led the rally, fueled by optimism around artificial intelligence and digital transformation. While large-cap earnings, particularly in Tech and Communication Services, showed resilience, cautious outlooks on supply chain and geopolitical risks persisted. Sector performance impacted DGRW, with underweights in Technology and Consumer Discretionary limiting gains, and overweights in Health Care and Energy posing additional headwinds.

Since the target fund is USD-denominated, the return of this peso share class fund was significantly higher than that of its dollar share class as the Philippine peso weakened against the US dollar.
