RISK PROFILE

High Risk

Fund risk ratings are calculated based on the historical volatility of the fund in order to match the client's risk profile. A risk profile of 5 matches with the aggressive investor, indicating a fund with a high volatility profile (i.e. growth equities).

MARKET COMMENTARY

Global equities posted a strong rebound in April, with Wall Street recording its best monthly performance since 2020. Investor sentiment was buoyed by resilient corporate earnings — particularly from megacap technology companies — as the S&P 500 and Nasdaq surged to record highs on the back of robust earnings growth and sustained enthusiasm around artificial intelligence. Asian markets also participated in the rally, with the MSCI Asia Pacific Index on track for its fourth consecutive weekly gain by month-end, led by technology and materials sectors. Semiconductor demand remained a key driver, with South Korean exports surging 48% year-on-year in April, anchored by the AI-fueled chip boom. Headwinds including trade tariff uncertainty, geopolitical tensions in the Middle East, and a delayed Federal Reserve rate cut outlook tempered but did not derail the broader advance.

Since the target fund is USD-denominated, the return of this peso share class fund was significantly higher than that of its dollar share class as the Philippine peso weakened against the US dollar.

FOOTNOTES

- ¹ Quoted Asset Management Charge is inclusive of Fund Manager, Custodian and Fund Administration fees and VAT. Please note that the target fund of the Fund charges a separate management fee which is included in the computation of the Fund's NAVPU.
- ² Volatility measures the degree to which the Fund fluctuates vis-à-vis its average return in a specific period. The lower the number, the more stable the Fund's return is.
- ³ The Fund targets a variable payout rate quarterly, which is not guaranteed and may change at the discretion of AXA Philippines.
- ⁴ Price return refers to the fund performance based on the NAVPU movement of the fund with the payout deducted from NAVPU
- ⁵ Total return refers to the fund performance based on the NAVPU movement of the fund with the dividend payouts taken into account as reinvested back to the fund value.
- ⁶ Cumulative returns is the total earnings performance of the fund in a specific period.
- ⁷ Annualized returns is the Compounded Annual Growth Rate, or the simulated growth rate on a yearly basis if Principal plus Interest are re-invested annually.
- ⁸ Dividend history reflects the payout rate and not the dividend yield.
