Target Payout³ **5.00% annualized**
Payout Frequency **Quarterly**

MARKET COMMENTARY⁹

In September, the WisdomTree U.S. Quality Dividend Growth Fund (DGRW) posted positive performance as markets continued a five-month rally ahead of the Federal Reserve's rate cut. The FOMC delivered a 25-basis-point cut on September 17, confirming expectations that the Fed would pursue a cycle of policy easing supported by inflation and labor market data. Most of the gains occurred before the announcement, reflecting investor optimism. DGRW's relative underperformance was primarily due to its underweight positions in the top-performing sectors—Information Technology, Utilities, and Communication Services—which outpaced the broader market, resulting in negative allocation effects. Overall, the fund's performance was shaped by sector weightings amid a favorable rate environment.

Since the target fund is USD-denominated, the return of this peso share class fund was significantly higher than that of its dollar share class as the Philippine peso weakened against the US dollar.

FOOTNOTES

¹ Quoted Asset Management Charge is inclusive of Fund Manager, Custodian and Fund Administration fees and VAT. Please note that the target fund of the Fund charges a separate management fee which is included in the computation of the Fund's NAVPU.

² Volatility measures the degree to which the Fund fluctuates vis-à-vis its average return in a specific period. The lower the number, the more stable the Fund's return is.

³ The Fund targets a 5.00% annualized payout rate (1.25% quarterly), which is not guaranteed and may change at the discretion of AXA Philippines.

⁴ Price return refers to the fund performance based on the NAVPU movement of the fund with the payout deducted from NAVPU

⁵ Total return refers to the fund performance based on the NAVPU movement of the fund with the dividend payouts taken into account as reinvested back to the fund value.

⁶ Cumulative returns is the total earnings performance of the fund in a specific period.

⁷ Annualized returns is the Compounded Annual Growth Rate, or the simulated growth rate on a yearly basis if Principal plus Interest are re-invested annually.

⁸ Dividend history reflects the payout rate and not the dividend yield.
