MARKET COMMENTARY

Global equities rallied strongly in April, more than recovering prior month's losses, supported by an Iran ceasefire, robust US corporate earnings, and solid economic data. Despite the Strait of Hormuz remaining closed — weighing on energy supplies and contributing to stagflation concerns in Japan and Europe — emerging markets outperformed developed peers. The VIX closed at 19.5, down 22.2% month-on-month, signaling improved market stability. Most MSCI ACWI sectors advanced, led by information technology, communication services, and industrials, while energy and health care edged lower. Key relative contributors included overweight positions in Broadcom and TSMC, and no exposure to ExxonMobil, while overweight positions in AstraZeneca and Northrop Grumman, along with the absence of AMD, weighed on relative performance.

Since the target fund is USD-denominated, the return of this peso share class fund was significantly higher than that of its dollar share class as the Philippine peso weakened against the US dollar.
