## MARKET COMMENTARY

The Fed maintained rates at 3.75% in March, citing a resilient economy despite weak job growth and ongoing global uncertainties from the Middle East conflict. The potential for stagflation worsens if the Strait of Hormuz remains closed beyond a month, impacting inflation and economic growth. U.S. growth slowed to 0.7% QoQ in 1Q-2026, with inflation steady at 2.4%, while consumer confidence declined and unemployment rose to 4.4%. U.S. 10-year yields fluctuated, initially dropping to 3.95% then surging to 4.48% amid oil supply disruptions and inflation concerns. The yield curve flattened as markets anticipated rate hikes in response to rising energy prices. The fund maintains a short duration bias, focusing on high coupon securities to mitigate volatility amid these evolving macroeconomic and geopolitical risks.
