MARKET COMMENTARY

The likelihood of December rate cut remains high at around 90%, driven by weak job growth, while inflation reached 3%, influenced by recent policy easing and higher service costs from tighter immigration policies. The economic environment shows divergence across sectors, supported by AI and fiscal easing, which help prevent a severe downturn. Near-term, the environment appears deflationary, but improvements are expected by 2026 as policy tailwinds take effect. Rising debt levels and fiscal dominance are likely to push long-term yields higher unless a recession occurs. The U.S. 10-year Treasury yields have declined to around 4% and is projected to have a near-term target of 4.22%, reflecting economic headwinds. Fund positioning has shifted to a more cautious stance, focusing on interest accruals over yield, amid delays in economic data due to the government shutdown.

FOOTNOTES

¹ Quoted Asset Management Charge is inclusive of Fund Manager, Custodian and Fund Administration fees and VAT. Please note that the target fund of the Fund charges a separate management fee which is included in the computation of the Fund's NAVPU.

² Volatility measures the degree to which the Fund fluctuates vis-à-vis its average return in a specific period. The lower the number, the more stable the Fund's return is.

³ Fund return refers to the fund performance based on the NAVPU movement of the fund.

⁴ Cumulative returns is the total earnings performance of the fund in a specific period.

⁵ Annualized returns is the Compounded Annual Growth Rate, or the simulated growth rate on a yearly basis if Principal plus Interest are re-invested annually.
