## MARKET COMMENTARY

The Fund delivered positive returns in July as the announcement of several trade agreements by the US administration brought more clarity to the markets regarding tariffs and supported risk sentiment in markets. Developed markets generated positive returns for the period and outperformed their Emerging market counterparts. JP Morgan US Select Equity was the leading contributor to performance for the period benefitting from its significant cash allocation for the period as the dollar strengthened against the Euro over the month. iShares Core MSCI Europe ETF was the leading detractor to performance as European equities lagged other major markets. Since the target fund is USD-denominated, the return of this peso share class fund was significantly higher than that of its dollar share class as the Philippine peso weakened against the US dollar.
