## MARKET COMMENTARY

Over the month, the market rebounded from a tech-led sell-off driven by concerns over an AI bubble, fueled by high valuations and substantial AI CapEx by megacap tech firms. Later in the period, sentiment shifted to optimism regarding a potential December rate cut. The growth bias in the US allocation and the overweight in Asia ex-Japan detracted from performance, while European active managers continued to contribute positively. Low tracking error active funds within the global allocation performed in line with their benchmarks. The recently added Global Technology fund outperformed the sector but lagged the broader market due to a correction in IT and growth stocks, particularly in the first half of the month.
