## MARKET COMMENTARY

The Philippine fixed income market became more cautious in December, with yields rising amid global macro signals, central bank policy adjustments, and year-end positioning. US data pointed to moderating growth and inflation, prompting a 25 basis point rate cut by the Federal Reserve, while the Bank of England also eased policy, contrasting with Japan's rate hike amid normalization. Locally, the Bangko Sentral ng Pilipinas cut rates by 25bps to 4.50%, citing subdued inflation and weak growth. Bond yields increased across the curve, especially in the 4-7 year segment. The fund's strategy shifted to a neutral to slightly overweight duration, expecting disinflation, softer domestic growth, and continued easing to support Philippine bonds over the medium term despite short-term volatility.

## FOOTNOTES

<sup>1</sup> Quoted Asset Management Charge is inclusive of Fund Manager, Custodian and Fund Administration fees and VAT. Please note that the target fund of the Fund charges a separate management fee which is included in the computation of the Fund's NAVPU.

<sup>2</sup> Volatility measures the degree to which the Fund fluctuates vis-à-vis its average return in a specific period. The lower the number, the more stable the Fund's return is.

<sup>3</sup> Fund return refers to the fund performance based on the NAVPU movement of the fund.

<sup>4</sup> Cumulative returns is the total earnings performance of the fund in a specific period.

<sup>5</sup> Annualized returns is the Compounded Annual Growth Rate, or the simulated growth rate on a yearly basis if Principal plus Interest are re-invested annually.
